- **Revenues** were up 4.5% for the fourth quarter versus the prior-year period, due primarily to higher commodity prices impacting the Company's supply chain revenues, higher same store sales in both domestic and international stores and store count growth in international markets. Partially offsetting these increases were lower Company-owned store revenues, due primarily to the sale of Company-owned stores to multiple franchisees during 2011.
- **Net Income** was up 27.9% for the fourth quarter versus the prior-year period, primarily driven by domestic and international same store sales growth, international store growth and lower interest expense.
- **Diluted EPS** was 52 cents on an as-reported basis for the fourth quarter versus 39 cents in the prior-year quarter. Diluted EPS, as adjusted was also 52 cents for the fourth quarter versus 40 cents in the prior-year quarter -- an increase of 12 cents, or 30%. This increase was primarily due to higher net income and lower weighted average diluted shares outstanding. **Items Affecting Comparability**

The Company's reported financial results for the fourth quarter and fiscal 2011 are not comparable to the reported financial results for the equivalent prior-year periods. The table below presents certain items that affect comparability between 2011 and 2010 financial results. Management believes that including such information is critical to the understanding of its financial results for the fourth quarter and fiscal 2011 as compared to the same periods in 2010 (See the *Comments on Non-GAAP Measures* section).

In addition to the items noted in the table below, the Company experienced lower interest expense primarily as a result of lower debt levels, further impacting comparability to the prior year periods. Lower interest expense resulted in an increase in diluted EPS of approximately one cent in the fourth quarter of 2011 and four cents in fiscal 2011 versus the comparable periods in 2010.

### **Comments on Non-GAAP Measures**

In addition to the GAAP financial measures set forth in this press release, the Company has included non-GAAP financial measures relative to items affecting comparability between fiscal quarters. Additionally, the Company has included metrics such as global retail sales growth and same store sales growth, which are commonly used statistical measures in the quick-service restaurant industry and are important to understanding Company performance.

The Company uses "**Diluted EPS, as adjusted,**" which is calculated as reported Diluted EPS adjusted for the items that affect comparability to the prior year periods discussed above. The most directly comparable financial measure calculated and presented in accordance with GAAP is Diluted EPS. The Company's management believes that the Diluted EPS, as adjusted, measure is important and useful to investors and other interested persons and that such persons benefit from having a consistent basis for comparison between reporting periods. Management uses Diluted EPS, as adjusted, to internally evaluate operating performance, to evaluate itself against its peers and to determine future performance targets and long-range planning. Additionally, the Company believes that analysts covering the Company's stock performance generally eliminate these items affecting comparability when preparing their financial models, when determining their published EPS estimates and when benchmarking the Company against its competitors.

The Company uses "**Global retail sales**" to refer to total worldwide retail sales at Company-owned and franchise stores. Management believes global retail sales information is useful in analyzing revenues because franchisees pay royalties that are based on a percentage of franchise retail sales. Management reviews comparable industry global retail sales information to assess business trends and to track the growth of the Domino's Pizza® brand. In addition, domestic supply chain revenues are directly impacted by changes in domestic franchise retail sales. Retail sales for franchise stores are reported to the Company by its franchisees and are not included in Company revenues.

The Company uses "**Same store sales growth,**" calculated by including only sales from stores that also had sales in the comparable period of the prior year. International same store sales growth is calculated similarly to domestic same store sales growth. Changes in international same store sales are reported on a constant dollar basis, which reflects changes in international local currency sales.

The Company uses "**Free cash flow,**" calculated as cash flows from operations less capital expenditures, both as reported under GAAP. Management believes that the free cash flow measure is important to investors and other interested persons, and that such persons benefit from having a measure which communicates how much cash flow is available for working capital needs or to be used for repurchasing debt, making acquisitions, repurchasing common stock, paying dividends or other similar uses of cash.

(NYSE: DPZ)**, the recognized world leader in pizza delivery, today announced a recapitalization in which certain of its subsidiaries intend to refinance their outstanding securitization debt. In April 2007, certain Domino's subsidiaries entered into a \$1.85 billion securitized financing facility consisting of \$1.7 billion of fixed rate notes and \$150 million of variable funding notes. As of January 1, 2012, the outstanding securitized debt balance was \$1.45 billion. Domino's intends to replace this with a new securitized financing facility, expected to consist of \$1.475 billion of fixed rate notes and \$200 million of variable funding notes, of which it is expected that \$100 million of the variable funding notes will be funded on the closing date. The new fixed rate notes are expected to require repayment near the 7th anniversary of the closing date and the new variable funding notes are expected to require repayment on or before the 5th anniversary of the closing date, with an option for up to two one-year renewals subject to certain minimum financial conditions.

The net proceeds of the new facility will be used to repay the 2007 notes in full and for general corporate purposes, which may include a special dividend to holders of common stock, other equivalent payments and stock repurchases. The consummation of the notes offering is subject to market and other conditions and is anticipated to close in the first quarter of 2012.

This press release does not constitute an offer to sell or the solicitation of an offer to buy the notes or any other security. The notes to be offered have not been, and will not be, registered under the Securities Act of 1933 and may not be offered or sold in the United States absent registration or an applicable exemption from the registration requirements of the Securities Act of 1933.
